

FOX THEATER

Walsenburg, Colorado

Contractor: Deep Roots Craftsmen

Architect: Form+Works Design Group, LLC

Engineer: JVA, Inc.

Project Supervisor: Craig Asher

Structural rehabilitation of a historic theater building involving temporary shoring, installation of new structural steel framing, and reinforcement of existing wood trusses. Work included lifting and stabilizing structural elements, inserting long-span steel beams through existing masonry walls, and integration of new structural members while preserving historic building fabric.
